CONNECTIONS**
SUIT ANY SANITISING SYSTEM

ENERGY SMART LINK

KEEP TURNING UP THE HEAT!

Spend more time in the pool with the whole family. Efficient pool heating and everyday swimming gives you more opportunities to create special memories with those you love. **Dive in, laugh and play... together.**

WHY I NEED AN INTEGRATED CONTROLLER?

The integrated controller (ESL) will fully automate the heating system for you. If the heat pump is required to run outside of normal filtration hours, it will enable the filter pump to turn on (so heat pump can operate), but not turn on the sanitiser. This will increase the efficiency of the heat pump, improve temperature stability, and ensure the pool is not over chlorinated.
